“I Cantori del Caldone” has a forty year history with his roots in the community of Goito. Initially it was promoting the local traditional chants from Mantua, and then developed in a diversified repertoire with musical genres that could be adapted to the potentialities of a men’s choir.

Indeed, at the moment, in the repertoire of “I Cantori del Caldone”, we can find traditional chants of the local area, chants from the tradition of Alpini, and Christmas chants, as well as arias of operas, swing and blues, ethnic and rock music, in order to meet the interests and likings of an increasingly varied and demanding audience.

At the moment the choir is formed by 20 singers and performs in the area with two big concert events where choirs from Italy and abroad with traditional and lyric repertoires take part.

Under the direction of Ms Nerile Januskaite, a young Conductor of great musical personality, the group “I Cantori del Caldone” has acquired a new character that is bringing the choir to the attention of the critique through numerous concerts held in Italy and Europe (France, Spain, Slovakia, Austria, Germany, Hungary, Lituania, etc). Those events contribute to the spread of the choral singing, constitute the point of contact with other personalities with the same interests through the exchange of knowledge, culture, and through the promotion of the Goito community’s traditions.
